

1080
16:9 1920 x 1080
4:3 1440 x 1080

The Canon A520 will shoot at 1600 x 1200 when you set its resolution to "M1" or "Medium 1" (superfine, fine or normal).

1600 x 1200 (4:3)

An interesting note: whereas 16:9 is the aspect ratio for high-definition and 4:3 are the proportions for standard-resolution, standard-resolution can also be defined as a 2:9 aspect ratio.
