

## Project 03: Visual Language

In this project you will explore relationships between rational and emotional creative methods. Chance or control, expression or “coolness” will be tested through painting, drawing and color applications. Facial gestures, calligraphy, mark-making techniques will help in expanding your visual language. The findings will be applied to design a set of instructional drawings.

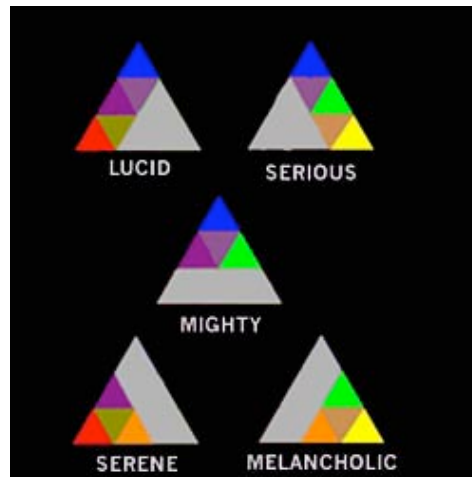

Assignment:

1. Make studies of emotions (facial expressions)
2. Decide on color palette and make the basic “emotional swatches”
3. Design a set of instructional drawings, which will be used and interpreted in the class

Facial expressions

Emotional color palette

instructional drawings + color code
